PROFESSIONAL SUMMARY

Middle Software Engineer with 4 years of experience in backend development.

Prioritize readability, maintainability, and extensibility in my code in all projects.

Proficient in finding valuable information from challenging sources.

Passionate about open-source development: contributed to several libraries and have a popular open source pet project.

WORK HISTORY

Backend Developer, 03/2023 to 10/2023

Everstake – Kyiv

Blockchain technology development company

- Solana, Rust, Anchor, Apache Kafka, RocksDB, ClickHouse

Backend Developer, 01/2022 to 03/2023

INC4 – Kyiv

Blockchain technology development company

- Served as one of the main developers on the [open-sourced AirDAO Bridge](#) project
- Performed extensive researches on challenging blockchain topics such as ETH Proof of Stake, ETH Slashing & Penalties, and others
- Maintained high standards of code quality and architecture.
Championed the importance of code quality and architecture within the team, consistently reminding team members of best practices and leading by example
- Developed an extensive understanding of blockchain technology and its intricacies
- Skilled in Solidity and JavaScript programming languages, having acquired a solid grasp of their fundamentals

Freelancer as Backend Developer, 07/2019 to 12/2021

FreelanceHunt

- Got [40+ reviews](#) from customers
- Was in Top-10 Chat-Bot Developer's rating for a long time
- Created at least 15 large Telegram Bots

- Integrated LiqPay, QIWI and Paykassa payment systems into several telegram bots

PET PROJECTS

GDZ Ukraine Bot, 07/2019 to Current

Blazingly fast way to get a solution for school homework.

- **~30 000 users**
- [Open-sourced project](#)
- Written in Python
- [Rewriting it in Go with clean architecture](#) (in progress)
 - Contributed to lesser-known [fsm-telebot](#) library because there were no other libs with FSM for Go
