PROFESSIONAL SUMMARY

Middle Software Engineer with 4 years of experience in backend development.

Prioritize readability, maintainability, and extensibility in my code in all projects.

Proficient in finding valuable information from challenging sources.

Passionate about open-source development: contributed to several libraries and have a popular open source pet project.

WORK HISTORY

Go/Mobile Native (Flutter) Fullstack Developer, 01/2024 to Current

Favbet – Kyiv

R&D Department

- Quickly and successfully adapted to the new field of **mobile development**
- Collaborated closely with team members

Go Backend Developer, 03/2023 to 10/2023

Everstake – Kyiv

Blockchain technology development company.

High load project with **huge** amount of **Solana** data

- Worked with **microservice** architecture communicating via **Apache Kafka**
- Conducted in-depth **research** on Solana blockchain, contributing valuable insights to optimize data parsing processes
- Developed basics in **Rust** programming language during the project, showcasing adaptability and a quick learning curve
- Acquired hands-on experience in new technologies, including **Solana**, **Anchor**, **Apache Kafka**, **RocksDB**, and **ClickHouse**

Go Backend Developer, 01/2022 to 03/2023

INC4 – Kyiv

Blockchain technology development company

- Served as **one of the main developers** on the [open-sourced AirDAO Bridge](#) project

- Performed extensive **researches** on challenging blockchain topics such as **ETH Proof of Stake, ETH Slashing & Penalties**, and others
- Maintained high standards of **code quality** and architecture.
Championed the importance of code quality and architecture within the team, consistently reminding team members of **best practices** and **leading** by example
- Developed an extensive understanding of **blockchain** technology and its intricacies
- Skilled in **Solidity** and **JavaScript** programming languages, having acquired a solid grasp of their fundamentals

Freelancer as Python Backend Developer, 07/2019 to 12/2021

FreelanceHunt

- Got [40+ reviews](#) from customers
- Was in **Top-10** Chat-Bot Developer's rating for a long time
- Created at least **15** large Telegram Bots
- Integrated **LiqPay**, **QIWI** and **Paykassa** payment systems into several **telegram** bots

PET PROJECTS

GDZ Ukraine Bot, 07/2019 to Current

Blazingly fast way to get a solution for school homework.

- **~30 000 users**
- [Open-sourced project](#)
- Written in Python
- [Rewriting it in Go with clean architecture](#) (in progress)
 - Contributed to lesser-known [fsm-telebot](#) library because there were no other libs with FSM for Go

SKILLS

- | | |
|--|---|
| • Go, Python, Rust, JS, Flutter (Dart) | • SQL: PostgreSQL, ClickHouse |
| • Blockchain: | • NoSQL: Redis, RocksDB |
| 1. Ethereum (Solidity) | • VCS: Git, GitHub, Gitlab |
| 2. Solana (Anchor) | • Linux, Vim |
| • OOP: Design Patterns | • AWS, GCP |
| • Code and Quality Standards | • Docker, Kubernetes (ESK, GKE, bare-metal) |
| • Clean Architecture | • Terraform |
| • Kafka, RabbitMQ | • gRPC |

HOBBIES

- Guitar
- Street Workout

Igor Sikorsky Kyiv Polytechnic Institute – Kyiv
